Our fuss free, pain free and revolutionary experience for semi-permanent hair removal

1 What is Laser Hair Removal?

Laser Hair Removal uses beams of specially filtered light to effectively stop hair growth at the root, preventing unwanted fuzz from sprouting back. We call on space-age technology which uses a variety of wavelengths to provide a tailored treatment for each customer..

2 What are the benefits?

Are you sitting down? Our Laser Hair Removal is virtually pain free. Most customers feel nothing more than gentle warmth. Not only this, but you'll experience smoother skin, all without the risk of ingrown hairs. Oh, and did we mention that you won't have to worry about hair removal for the foreseeable future?

3 Is the treatment safe?

Yes, 100%. Some customers experience slight redness, but there is no down-time involved, although we recommend avoiding intensive exercise for at least 24 hours. Laser hair removal works by heating the hair follicle, but our state-of-the-art sapphire tip prevents the light converting to heat in the dermis, which keeps the skin cool and comfortable.

4 How many sessions do I need, and how often do I need a treatment?

Most customers will see around a 20% reduction in hair growth after each treatment, although this does vary, so we recommend a course of at least six sessions to reduce your hair to a zip. It's best to book your treatments 4-6 weeks apart.

5 Will Laser Hair Removal work for me?

Our Laser is FDA approved to treat all skin types, which means it's effective on light and dark skin. We recommend you book a free consultation and patch test with our therapists to be on the safe side.

6 What body areas can be treated?

You name it, we can reach it. From the face to the toes and the larger areas such as legs and back.

7 How long will results last?

Some customers never have to worry about hair removal again, but every body is different. We can only promise permanent hair reduction, but ask your therapist for more information.

Got any unanswered questions? Drop us an email, pop into a salon or give us a call.
